

Internship Project: University Website Design

Tech Stack (Mandatory)

- **Frontend:** React.js (with Vite or Next.js preferred)
 - **Styling:** Tailwind CSS
 - **Theme:** Red-based modern UI (primary color)
 - **Design:** Fully responsive (mobile, tablet, desktop)
-

Reference Websites (Malaysia – Real Examples)

Use these as **UI/UX inspiration (DO NOT COPY)**:

1. Universiti Malaya (UM)

 <https://www.um.edu.my/>

- Clean layout + strong branding
 - Clear navigation (Study, About, Research)
 - Good use of hero banner & content sections
-

2. Universiti Teknologi Malaysia (UTM)

 <https://www.utm.my/>

- Modern homepage sections (news, rankings, CTAs)
 - Highlights achievements and dynamic content
 - Structured mega navigation
-

3. Monash University Malaysia

 <https://www.monash.edu.my/>

- Premium professional design
 - Large hero area with CTA
 - Interactive elements like chat, events, rankingsmonash
-

4. Universiti Kuala Lumpur

 <https://www.unikl.edu.my/>

- Student-focused design
 - Quick access buttons (Apply, Programs)
 - Clean and strong content hierarchyunikl
-

5. Universiti Malaysia Sarawak (UNIMAS)

 <https://www.unimas.my/>

- Modern storytelling homepage
 - Program sections + community highlights
 - Balanced academic + lifestyle contentunimas
-

Important Learning:

- University websites are the **main decision platform for students**
 - They must be **visually engaging, fast, easy to navigate, and mobile-friendly**
-

Required Pages

1. Home Page

Must include:

- Hero section (image/video + CTA)
- Search bar (AI search later)
- Featured programs
- About preview (short)
- News/events section

- Testimonials
 - Footer with links
-

2. About Us Page

- University overview
 - Mission & vision
 - Leadership / faculty section
 - Campus images
-

3. Programs List Page

- Filterable program list
 - Categories (Engineering, Business, IT, etc.)
 - Search + filter (important)
-

4. Program Details Page

- Full program description
 - Duration, fees, requirements
 - Career opportunities
 - Apply button
-

5. Contact Us Page

- Contact form
 - Map (Google Maps)
 - Email, phone, address
 - FAQ section
-

AI Features (Must Include)

Give them **simple AI features (realistic level)**:

1. 🔍 AI Smart Search

- Users type: "IT course" / "cheap program"
 - Show relevant programs
 - Optional: integrate OpenAI API or local keyword-based AI
-

2. AI Chatbot (Basic)

- Questions like:
 - "What programs are available?"
 - "How to apply?"
 - Can be rule-based OR API-powered
-

3. Recommendation System

- Input: interest (e.g., "technology")
 - Output: recommended programs
-

4. AI FAQ Generator

- Suggest answers automatically from dataset
-

UI/UX Requirements

Must follow these principles (very important):

Design Guidelines

- Red theme (Primary)
 - White + gray neutral background
 - Modern fonts (Inter / Poppins)
 - Cards with shadows
 - Smooth animations
-

Features to include

- Responsive navbar with mobile menu
- Sticky header
- Dark/light mode (bonus)
- Smooth scrolling

- Loading skeletons
- Error pages (404)

Suggested Folder Structure

```
src/  
├── components/  
├── pages/  
├── layouts/  
├── data/  
├── hooks/  
├── services/  
├── assets/  
└── utils/
```

Management System

- Authentication (student login)
- Application form
- CMS-style admin panel
- Blog/news system
- Multilingual support

Evaluation Criteria

Criteria	Weight
UI/UX Design	30%
Responsiveness	20%
Code Quality	20%
Features (including AI)	20%
Creativity	10%

Final Deliverables

- GitHub repository
 - Live deployed website (Vercel/Netlify)
 - Documentation (README)
 - Demo presentation
-

🔥 Extra Tip for Improvement

A great university website should:

- Answer questions quickly
- Look professional and trustworthy
- Be easy to navigate
- Highlight programs and career outcomes

👉 Studies show **most students rely heavily on university websites before applying**, making UX critical

📊✅ Grading Rubric (100 Marks Total)

1. 🎨 UI/UX Design (30 Marks)

Criteria	Marks	Description
Visual Design	10	Modern layout, red theme consistency, clean look
User Experience	10	Easy navigation, logical flow
Responsiveness	10	Works perfectly on mobile, tablet, desktop

2. 🧩 Functionality (20 Marks)

Criteria	Marks	Description
Page Completion	10	All required pages implemented
Navigation	5	Working routing (React Router / Next)
Forms	5	Functional contact form

3. 🖥️ Code Quality (20 Marks)

Criteria	Marks	Description
Code Structure	8	Organized folders, reusable components
Clean Code	6	Naming, readability, no redundancy
Performance	6	Optimized images, loading speed

4. 🤖 AI Features (20 Marks)

Criteria	Marks	Description
AI Search	8	Smart search or recommendation system
AI Chatbot	6	Functional chatbot (basic acceptable)
Innovation	6	Any extra AI feature

5. 🚀 Deployment & Delivery (10 Marks)

Criteria	Marks	Description
Deployment	5	Live site (Vercel / Netlify)
Documentation	3	README, setup instructions
Presentation	2	Final demo clarity

✅ Pass Benchmark Recommendation:

- Below 50 → Needs improvement
- 50–70 → Average
- 70–85 → Good
- 85+ → Excellent

📅 4-Week Gantt Chart (Project Plan)

🟢 Week 1 – Planning & Setup

🎯 Goal: Project Foundation Ready

Tasks:

- Requirement understanding
- Analyze reference websites
- Wireframe design (Figma optional)
- Setup project (React + Tailwind)
- Create reusable components (Navbar, Footer)

Deliverables: ✅ Wireframe / design layout

✅ Project initialized

✅ Basic layout (header, footer, homepage skeleton)

🟡 Week 2 – Core Pages Development

Goal: Static Pages Completed

Tasks:

- Home Page UI
- About Us Page
- Contact Page (with form)
- Basic routing setup

Deliverables:  Fully designed homepage

 About + Contact page completed

 Responsive layout working

Week 3 – Programs + Features

Goal: Functional System Ready

Tasks:

- Program list page
- Program details page
- Filtering & search (basic)
- Add animations and UI enhancements

Deliverables:  Program list + details pages

 Search/filter working

 UI polish (animations, cards, hover effects)

Week 4 – AI + Finalization

Goal: Complete Product + Deployment

Tasks:

- Implement AI search / chatbot
- Optimize responsiveness & performance
- Deploy website
- Prepare presentation

Deliverables:  AI functionality working

 Fully responsive website

 Live deployment

 Final presentation slides

Timeline Visualization

Week 1:   (Setup & Planning)
Week 2:   (Core Pages)
Week 3:   (Programs + Features)
Week 4:  (AI + Final + Deploy)

Final Day (End of Week 4)

Presentation Requirements (30–45 mins)

They should present:

- Project overview
 - Features demonstration
 - AI implementation explanation
 - Challenges faced
 - Future improvements
-

Thank You
